**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments, filed 8/16/10, with respect to claim 8 have been fully considered and are persuasive. The previous rejection has been withdrawn.

***Allowable Subject Matter***

Claims 8-9 and 12-13 are allowed. The following is an examiner's statement of reasons for allowance: Lesguillier teaches the use of a transmitter (item 1) divided and separated into at least a first (Fig. 2a) and second parts (Fig. 2b) connected by a signal cable (see connecting cables in Fig. 2), said first part including at least the signal shaping and adjustment devices (items 3 and 4). Lesguillier further teaches said second part (Fig. 2b) including at least the signal amplifier (item 6) and a connecting unit (coupler) for connection to the electrical network (power line) and the connecting cable connecting said second part at least near to phase and zero rails (rails associated power line) outlet (item 22) of the electrical network; wherein the first part steers operation (via item 4) of the second part over the signal cable. Lesguillier nor the cited art in combination teaches the further limitation said first part including at least the control devices, one of said first and second part including the signal shaping and adjustment devices for generating the data transmission signal, said second part

including at least the signal amplifier, a connecting unit for coupling the data transmission signal to the electrical power network, and the connecting cable connecting said second part at least near to phase and zero rails or to a wall outlet of the electrical power network. At least this further limitation is not taught or rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
